

## HOW TO PACK YOUR WING-SURFER

In order to prolong the life of your Wings PVC Windows, avoid creating any corners while packing up your Wing.

**1]** Roll the Wing-Surfer from the tips to the center strut from both sides.

**2]** Once your Wing is folded from both ends, take the back end of your Wing-Surfer and fold it up to the back of the window – make sure you are not folding the window as you want to avoid creases.

**3]** Make sure there are no creases on the window then slide into the bag.\*

*\*This bag will be shipped to all customers that purchased the S25 Wing-Surfer as a replacement for the backpack. In the meantime, do not fold to fit into backpack. If you have any questions please contact your local Naish Dealer.*
