Alpride airbag system E1

The Alpride E1 airbag system is an electrical airbag system and is powered with 2 x AA battery (visible under the battery cover)

The Alpride E1 system has:

- No LI-Po or Li-ion Batteries
- No Pyrotechnics
- No Cylinders under pressure / cartridges of compressed gas
- No components classified under Dangerous Good Regulations
- By switching OFF the system, there are no risks to be accidentally activated.
- The E1 airbag system is fitted with pressure relief valves.

A handwritten signature in blue ink, appearing to read 'M. Schaer', written over a light blue grid background.

Marc-Antoine Schaer
